

## Installing Garmin Basecamp

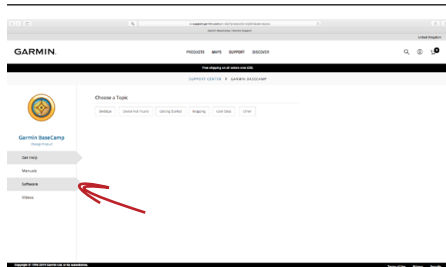

### 1 Go to [www.garmin.com](http://www.garmin.com)

From the home page, hit the "Support" dropdown menu and select Support Centre.

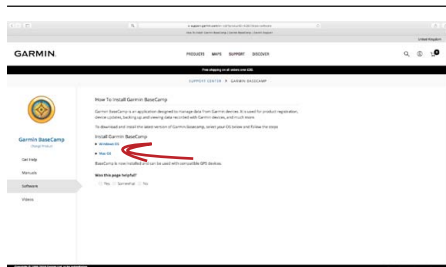

### 2 Search for Garmin Basecamp

Just type it into the search bar.

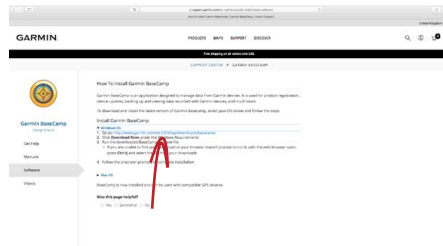

### 3 Select the "Software" tab

Just click it.

### 4 Pick a flavour

There are separate Windows and Mac OS versions of Basecamp. Select the one for your computer.

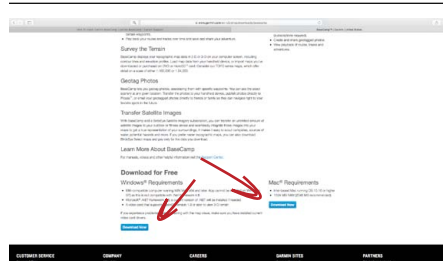

### 5 Click the link

Still not there... But this link will get you closer to downloading it.

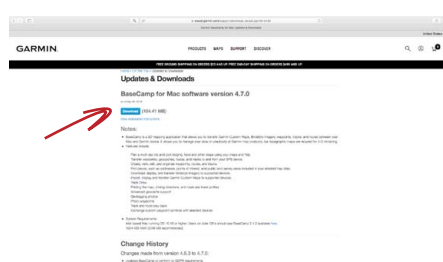

### 6 Read the blurb

Or maybe don't bother. But don't give up... just scroll down.

### 7 Finally... download Basecamp?

Select the relevant platform for you at the bottom of the screen and click.

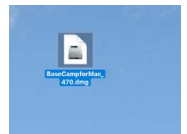

### 8 Gotcha... One more screen

But when you click this Download button, it does actually download the installer

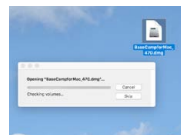

### 9 Find the installer

It will probably be in your Downloads folder.

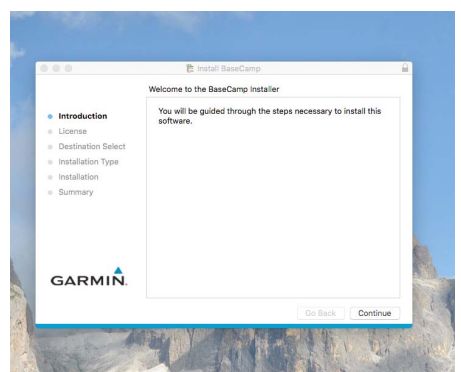

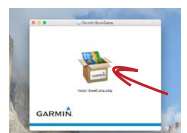

### 10 Expand it

Double-click the hard-drive icon to open the installer...

### 11 Use it

...which will produce this friendly little box. Double click it.

### 12 Agree with it

The installer will guide you through the rest of the process. From this point on, it really is simple.
